Split Voice System — PowerPoint Brief

For: the person making the PowerPoint
Goal: make the voice section look special with clear diagrams
Slides: 6 only · short text · big visuals

> **One sentence for the whole section:**
> Patient sends a WhatsApp voice note → AI understands → system checks hospital data → bot continues booking with normal WhatsApp buttons.

> **How to use diagrams:** copy the image into the slide (recommended), or redraw the same shapes in PowerPoint.
> PNG files are in `docs/images/voice/`

Slide 1 — Title

1 Put on slide

- **Title:** Split Voice System
- **Subtitle:** Book by speaking on WhatsApp
- **Keywords:** **Voice note** **AI plan** **Hospital DB check**

Optional small icon: microphone + WhatsApp. No big diagram yet.

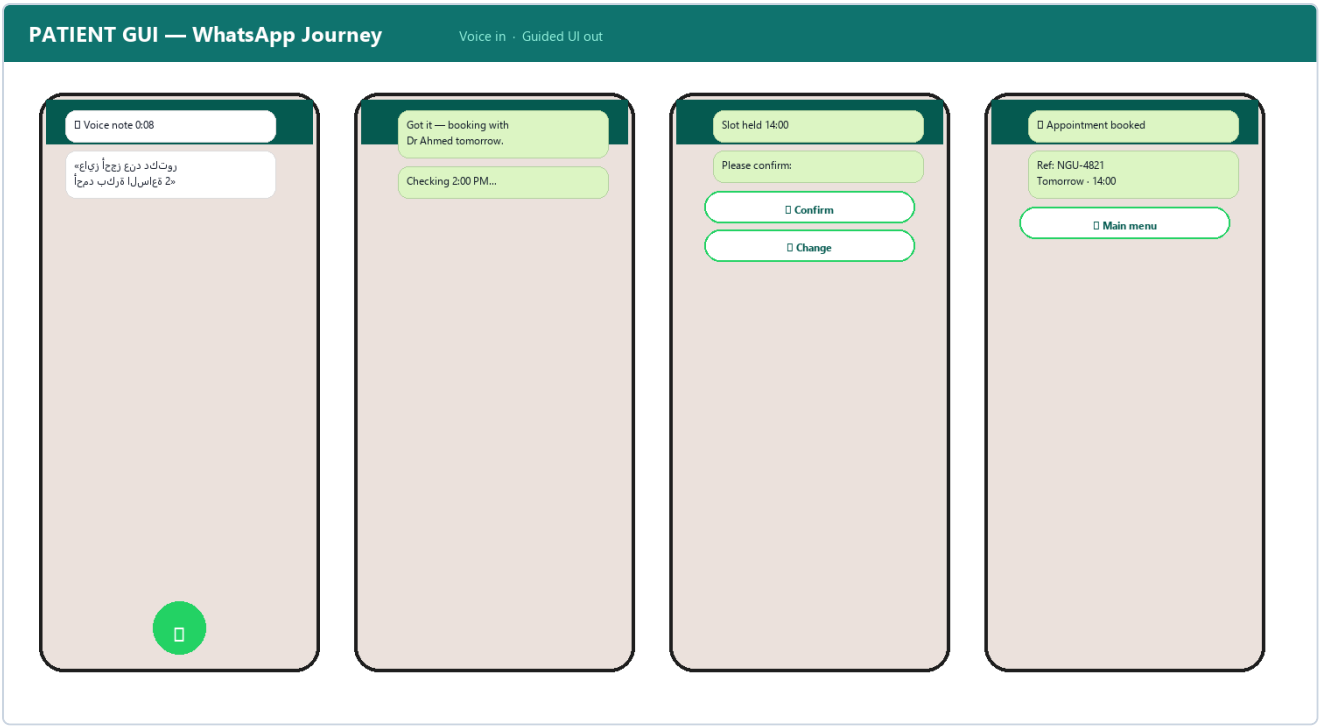

Slide 2 — Patient experience + GUI

2 Put on slide

- **Title:** Patient experience
- Patient sends a WhatsApp voice note
- Bot replies with normal text + buttons
- Same booking flow as typing · no robot voice reply

Keywords: **WhatsApp** **Voice in** **Buttons out**

Diagram to use: `v03-whatsapp-gui.png`

Copy this GUI journey onto Slide 2 — it makes the section look product-real, not only technical.

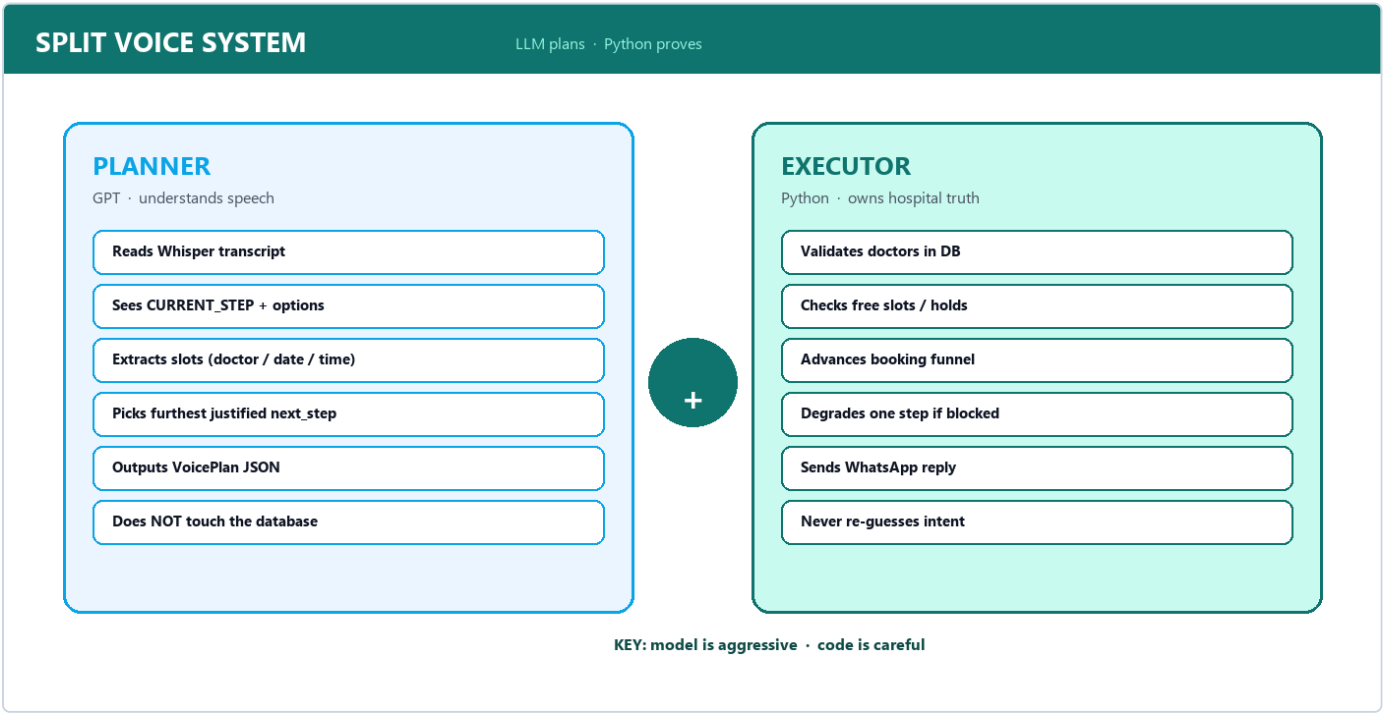

Slide 3 — The split idea (hero diagram)

3 Put on slide

- **Title:** Planner + Executor
- Left: Planner (AI) understands speech and picks next step
- Right: Executor (System) checks real doctors/times in DB
- Bottom line: AI suggests · System confirms

Keywords: Planner Executor Split

Diagram to use: `v01-split-idea.png` — make this the biggest visual in the section

Hero diagram for Slide 3. Keep bullets short — let this image carry the slide.

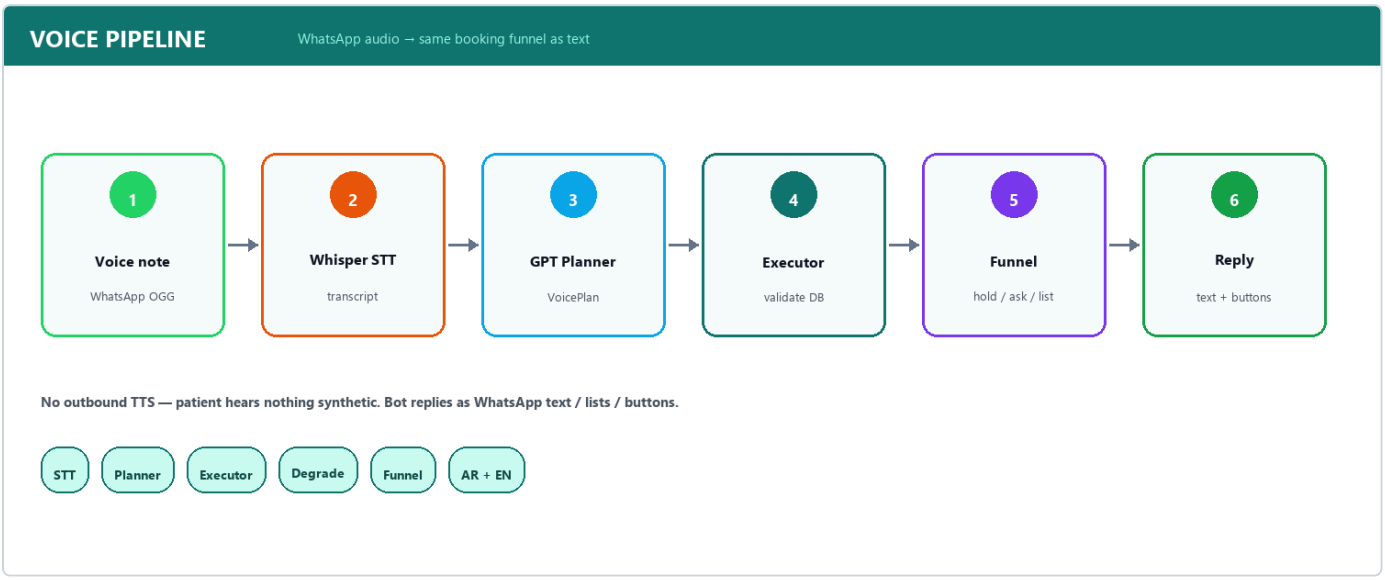

Slide 4 — Main flowchart

4 Put on slide

- **Title:** How voice booking works
- Almost empty slide — big flowchart only

Keywords under chart: `Whisper` `VoicePlan` `Validate` `Book / Ask`

Diagram to use: `v02-pipeline.png`

Main flowchart for Slide 4. If redrawing in PPT: 6 boxes — Voice note → STT → AI plan → Executor → Funnel → Reply.

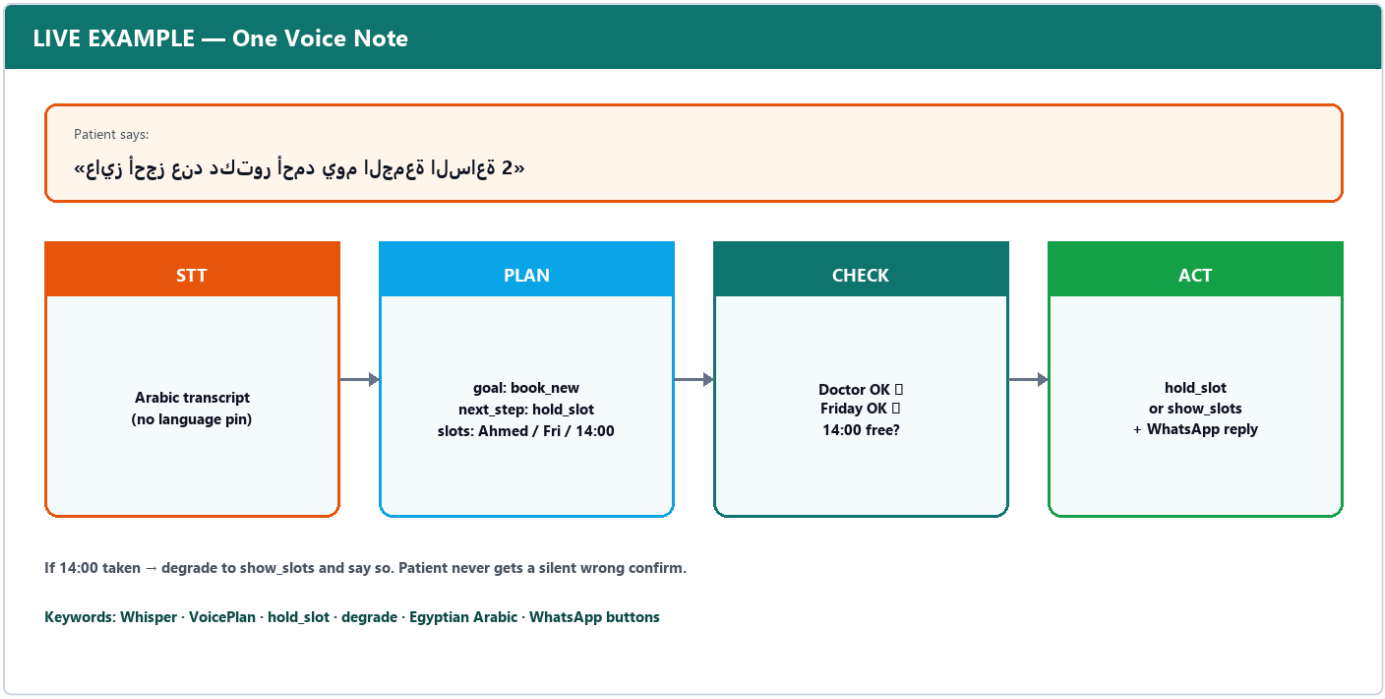

Slide 5 — Example + safety fallback

5 Put on slide

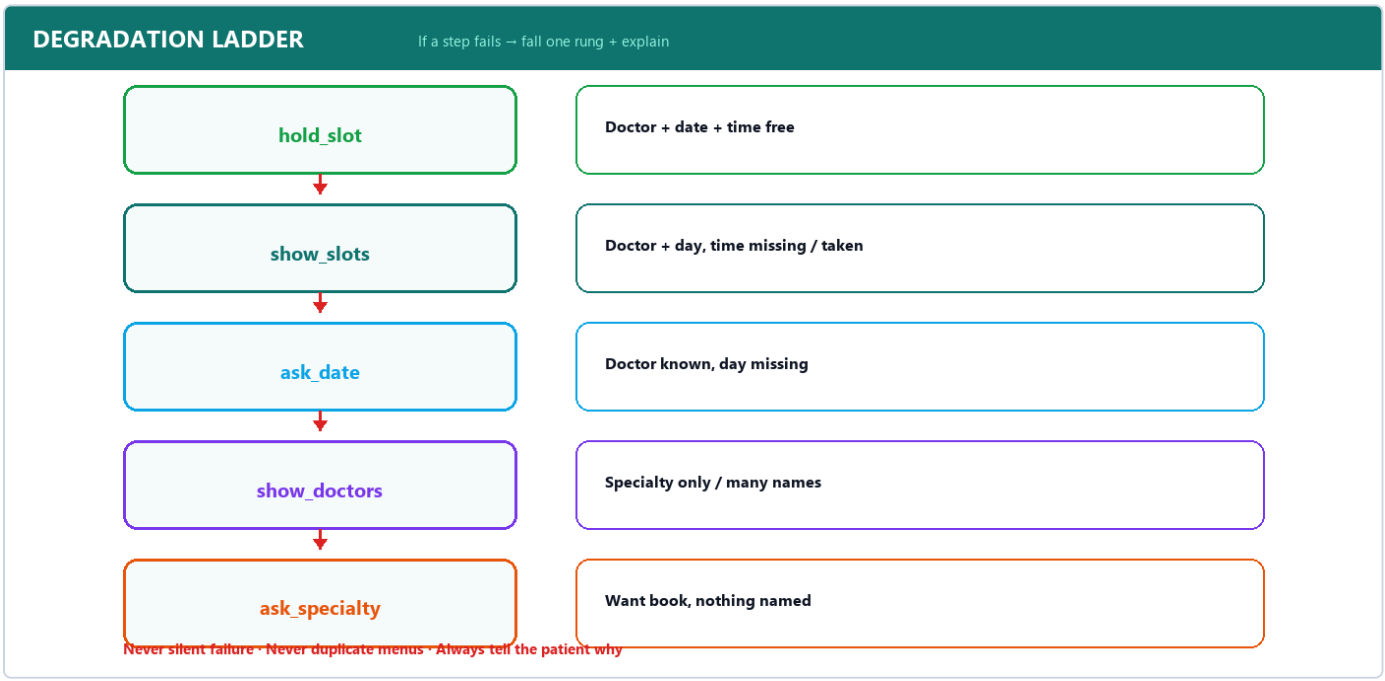

- **Title:** Example
- Patient: "I want Dr Ahmed on Friday at 2"
- AI plan: book → hold that slot
- System checks doctor / Friday / 2:00
- If free → confirm · If not → show other times

Keywords: `Example` `Hold slot` `Fallback`

Main diagram: `v09-example.png`
Optional small second diagram: `v05-degrade.png` (fallback ladder)

Use on Slide 5 as the story diagram.

Optional on Slide 5 (corner/side) or a bonus slide — shows safe fallback if the exact time is taken.

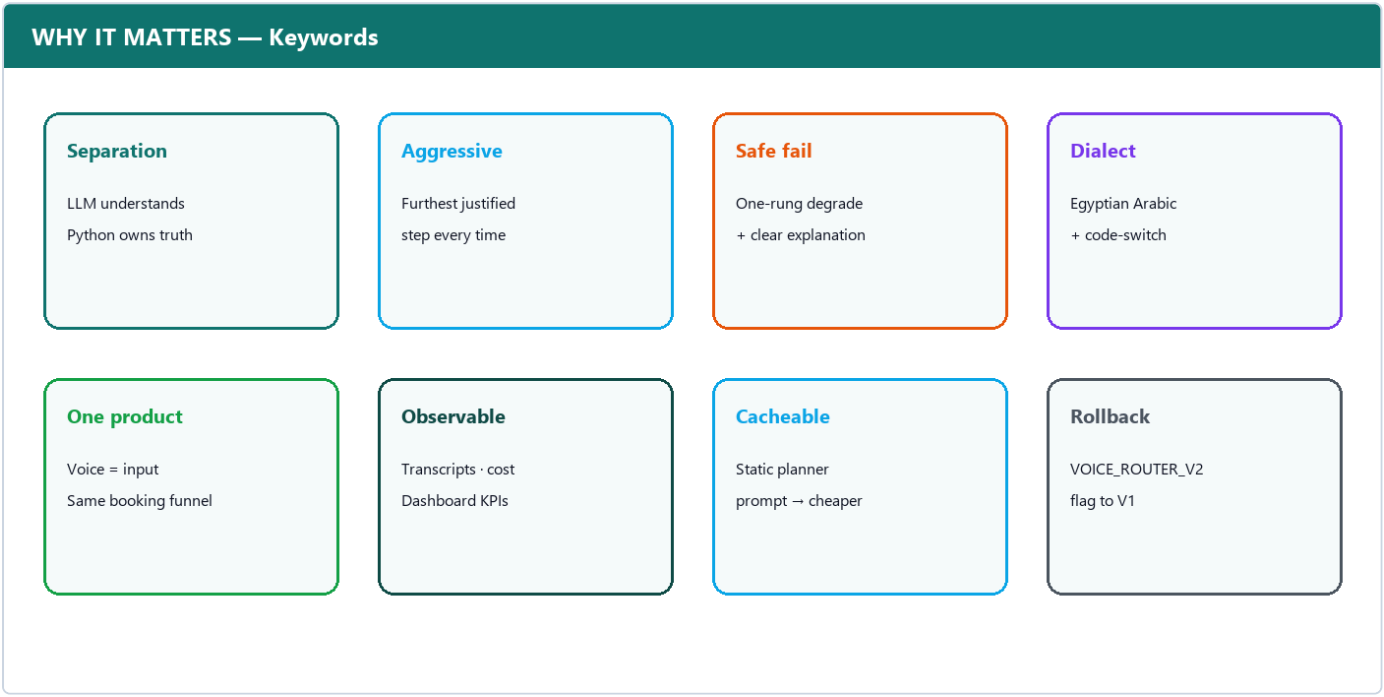

Slide 6 — Why it matters

6 Put on slide

- **Title:** Benefits
- Faster booking by voice
- Works in Arabic + English
- AI does not invent appointments
- Hospital data is the source of truth
- Same product as text chat

Keywords: Safe | Arabic + English | One product

Diagram to use: `v10-benefits.png` or side-by-side before/after `v06-v1-v2.png`

Closing visual for Slide 6.

Diagram pack (quick map)

Slide	PNG file	What it is
2	`v03-whatsapp-gui.png`	Patient WhatsApp GUI journey
3	`v01-split-idea.png`	Planner vs Executor (hero)
4	`v02-pipeline.png`	End-to-end flowchart
5	`v09-example.png`	Live example story
5 optional	`v05-degrade.png`	Fallback ladder
6	`v10-benefits.png`	Benefits / keywords wall
6 alt	`v06-v1-v2.png`	Before vs after

Do / Don't

Do	Don't
Make diagrams large (full-slide feel)	Tiny icons in a corner

Keep 6 slides · short bullets	Long paragraphs or code
Use teal/hospital colors	Look like a separate voice app
One big visual per slide	Stack all diagrams on one slide

Presenter talk track: **VOICE_EXPLAIN.pdf** · PNG folder: `docs/images/voice/`
