Split Voice — What to put in PowerPoint

For: PPT designer
From: Voice system owner
Please add 4 slides in the Hospital Chatbot presentation (same style as the rest of the deck).

> Keep text short. Use **keywords + simple diagrams**. I will explain the details when presenting.

Slide 1 — Title / Keywords

Title: Split Voice System

Put these 4 keyword cards:
Voice Note **STT (Whisper)** **AI Plan** **DB Check**

Small pills under: **No TTS** **Same funnel** **AR + EN**

Slide 2 — Why Voice?

Title: Why Voice?

Left side — PROBLEM keywords:

- Typing friction
- Dialect hard to type
- Chat drop-off
- Slow booking

Right side — SOLUTION keywords:

- Speak naturally
- Same booking flow
- Faster engage
- No separate app

Slide 3 — Architecture (diagram)

Title: Architecture

One flowchart (big):
Whisper → Planner → Executor → Reply

Under each box (small keywords):

- Whisper = STT
- Planner = VoicePlan / AI
- Executor = DB Validate
- Reply = WhatsApp buttons

> **Bottom line:** AI suggests · System confirms · DB = source of truth

Slide 4 — Key Points

> **Title:** Key Points
>
> **4 keyword cards:**
>
> - **Input only** — not a new bot
> - **AI plans** — next booking step
> - **System proves** — live hospital DB
> - **Buttons out** — no robot voice
>
> **Pills:** **Safe** **Arabic + English** **One product**

Please do / don't

- **Do:** match the existing Hospital Chatbot slide style
- **Do:** keep keywords big and clear
- **Do:** make the architecture flowchart large on slide 3
- **Don't:** write long definitions or paragraphs
- **Don't:** add code, file names, or API details

One-line summary for you: Patient sends WhatsApp voice note → Whisper text → AI plans → system checks hospital DB → WhatsApp buttons reply.
